Office Action Summary Examiner							
Examiner Stephen J. Kalartu 1745		Application No.	Applicant(s)				
Stephen J. Kalafut 1745		09/501,621	MILLS, RANDELL L.				
The MALING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ② MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MALILING DATE OF THIS COMMUNICATION. Formation of this may be senialized under the provisions of 2 FCR 1.13(a), in no event, nowers, may recty be timely filled. If NO period for reply is pecified above, the maintenut statutory period will apply and will expire SIX (8) MONTHS from the mailing date of this communication. Failure to reply which the set or cented deriod for reply its pecified above, the maintenut statutory period will apply and will expire SIX (8) MONTHS from the mailing date of this communication. Failure to reply which the set or cented deriod for reply its pecified above, the maintenum statutory period will apply and will expire SIX (8) MONTHS from the mailing date of this communication. Failure to reply which the set or developed period for this communication. Failure to reply within the set or extended deriod for reply by the attatutory and set of this communication. Failure to reply within the set or extended deriod for reply its petitude. Failure to reply within the set or extended deriod for reply by the subtatutory. Failure to reply within the set or extended deriod for reply its petitude. Failure to reply within the set or extended period for reply set of this communication. Failure to reply within the set or extended period for reply its device. Failure to reply within the set or extended period for reply with the set or extended period from the mainty flex or extended period from the mainty flex or extended period from the flex or extended period f	Office Action Summary	Examiner	Art Unit				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Eachsteins of time rays be available under the provisions of 37 CFR 1.38(a). In no event, however, may a rayby be timely filled - If No pends of crey is specified above, the maximum statutory parised will pay and will expire 3X (b) MONTH'S from the mailing date of this communication, or specific provided by the Office in the Internation and statutory parised will pay and will expire 3X (b) MONTH'S from the mailing date of this communication, even if timely filled may reduce any statute parised patients on the second of this communication, even if timely filled may reduce any statute parised patients on the second of this communication, even if timely filled, may reduce any statute parised patients on the second of this communication, even if timely filled, may reduce any statute parised patients on the second of this communication, even if timely filled, may reduce any statute parised patients of the second of this communication, even if timely filled, may reduce any statute parised patients of the second of this communication, even if timely filled, may reduce any statute parised patients of the communication of the communication. 1) Responsive to communication(s) filled on OA Any event parised patients of the patients		Stephen J. Kalafut	1745				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. Estatutions of time may be available under the provisions of 3° FR1 *130°, in an event, however, may a reply be timely liked in the provision of 3° FR1 *130°, in an event, however, may a reply be timely liked. If IVO period for reply is specified above, the maximum statutory period will apply and will expire \$1X\$ (8) MONTHS from the maling date of this communication. Failable for pery livinith set of or celeratinel period for reply in 19 station, cause the application of the communication. Failable for pery livinith set of or celeratinel period for reply will, by station, cause the application, even if timely filed, may reduce any variety received by the Office lips in the maling date of this communication, even if timely filed, may reduce any control plant in malignature. See 3° CFR 1.79(4). Status 1) Responsive to communication (s) filed on \$\textit{Q4}\$ November 2005. 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under \$Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4) Claim(s) \$\frac{1}{2}ZZ\$ is/are periodiced. 5) Claim(s) \(\frac{1}{2}ZZ'Z \) is/are allowed. 6) Claim(s) \(\frac{1}{2}ZZ'Z \) is/are objected to. 8) Claim(s) \(\frac{1}{2}ZZ'Z \) is/are objected to. 8) Claim(s) \(\frac{1}{2}ZZ'Z \) is/are objected to by the Examiner. 10) The drawing(s) filed on \(\frac{1}{2}Z \) is/are allowed. 6) Claim(s) \(\frac{1}{2}ZZ'Z \) is/are objected to by the Examiner. Application Papers 9) The specification is objected to by the Examiner. 10) Claim(s) \(\frac{1}{2}ZZ'Z \) is/are objected to by the Examiner. 10) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. \(\frac{1}{2}Y \) 19(a)-(d) or (f). 10) Acknowledgment is made of a claim f		ears on the cover sheet with the c	orrespondence address				
1) Responsive to communication(s) filed on <u>04 November 2005</u> . 2a) This action is FINAL. 2b) This action is non-final. 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Disposition of Claims 4 Claim(s)	A SHORTENED STATUTORY PERIOD FOR REPLY WHICHEVER IS LONGER, FROM THE MAILING DA - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period w - Failure to reply within the set or extended period for reply will, by statute, Any reply received by the Office later than three months after the mailing	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be tirr rill apply and will expire SIX (6) MONTHS from cause the application to become ABANDONE	the mailing date of this communication. D (35 U.S.C. § 133).				
2a) ☐ This action is FINAL. 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213. Claims 1-272, for reasons of record, are rejected under 35 U.S.C. §101 because the disclosed invention is inoperative and therefore lacks utility. See paper nos. 3 and 11.

Claims 1-272, for reasons of record, are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. See paper nos. 3 and 11.

Applicant's arguments filed 04 November 2005 have been fully considered but they are not persuasive.

Applicant argues (page 21) that the office has not identified a single physical law which has been violated. The alleged transition of hydrogen to a state lower than the principal quantum number equaling 1 (the "ground state") would be such a violation, because the "ground state" is the minimum amount of energy which can be exhibited by the electron of a hydrogen atom. This is shown by Krieg, cited in paper no. 60. Applicant's alleged "new ground state", where the orbital speed of the electron is limited by the speed of light, is based on Lorenz contraction, which can only occur in an inertial reference, *i.e.*, one which is not accelerating. An electron moving around an atomic nucleus, even if orbiting at a constant speed, is changing direction, and is therefore changing velocity, and thus undergoing acceleration. (Since velocity is a vector quantity, a change to either its magnitude or to its direction constitutes acceleration.)

Art Unit: 1745

Applicant argues (page 21) that the "Committee" has not found fault with his data on "legitimate scientific grounds", but has only nitpicked on "theoretical grounds". This is not persuasive because theoretical grounds are not distinct from scientific grounds, but are a subset thereof, since theory is an aspect of science.

Applicant argues (page 22) that he does not need to understand the theoretical basis for his invention. This does not mean that an applicant is free to put forth any theory he wishes.

Any theory alleged by an applicant (not just the present applicant, but *any* applicant) has to make sense according to accepted scientific principles.

Applicant argues (starting on page 58) that independent third parties have generated data supporting his alleged lower states of hydrogen. This is not persuasive for reasons set forth in the attached Appendix, pages 1-13. Moreover, some of the articles cited in the IDS not only do not support applicant's theory, but also find drawbacks to it. For example, Cvetanovic *et al*. (cited on page 4 of the IDS of 04 November 2005), on page 7, list several "experimental facts" which cannot be explained by applicant's alleged mechanism for Balmer line broadening, called the "resonance transfer model", abbreviated as "RTM". The article entitled "Attempt to Observe Excess Heat in a Ni-H₂O-K₂CO₃ Electrolysis System" (cited on page 12 of the IDS) concluded with "Our Mills experiment showed no detectable sign of excess heat." Rathke, in "A Critical Analysis of the Hydrino Model" (cited on page 12 of the IDS), finds applicant's theory ("CQM") "mathematically inconsistent in several points" (page 5, first full ppg.), and recommends that "experimental evidence put forth in favor of the existence of hydrinos should be reconsidered for interpretation in terms of conventional physics" (page 6, just above the footnotes). According top Barth, in "Bigger Than Fire?" (cited on page 11 of the IDS), applicant overlooks the

Art Unit: 1745

electromagnetic attraction between the nucleus and the electron, and does not use Planck's constant (starting at page 42, right column).

Applicant alleges a conflict of interest on the part of Dr. Bernard Souw, who has authored Appendices, and has been consulted during the examination of the present application, since Dr. Souw's consulting firm, BMS, would be a competitor of applicant's company, Blacklight.

Applicant only shows that BMS has done consulting work in two fields in which applicant believes his invention to be applicable. However, these fields are microwave plasmas and CVD analysis, which do not necessarily require the use of hydrinos, while applicant's invention (in the present application) deals with thermionic cathodes doped with alleged hydrino atoms and hydrino molecules, which are not claimed in any relation to microwave plasmas or CVD. Even if these were competing fields, Dr. Souw would have the option of either withdrawing from working on the present application, or refraining from working on the competing subject matter outside of the PTO.

Applicant argues (page 124) that the "Secret Committee" has ignored "most of Applicant's scientific evidence." In paper no. 36, pages 2 and 3, the office has identified the differences in the energy levels predicted by applicant's theory, and found that they do not correspond to some of the values shown by applicant's experiment. Neither pointing out this inconsistency, nor being unpersuaded by the evidence constitutes an act of ignoring the evidence. While applicant argues that there is no requirement that each catalyst exhibit all of the possible lower energy states, the data accounts for some energy transitions that are not predicted at all by applicant's own formula.

Applicant argues (pages 129-130) that the Examiner's calculations do not take into account the catalyst enthalpy. This is not persuasive because in order for a certain level of energy to be transferred from one species to another, both must be able to accommodate, either giving or receiving, that particular amount. The hydrogen atom, as postulated by applicant, can only release energy in certain amounts, expressed as values of "q", some of which do not correspond to the data offered by applicant.

Applicant argues (page 126) that many of his cited articles "have in fact passed the peer-review process" (emphasis applicant's). The fact that some may have passed this process does not nullify the fact that others have not. The failure to pass or undergo peer review is only one of several reasons why applicant's evidence is unpersuasive.

Applicant insists (page 161) that attachments A through R relate to issues relate directly to issues involving the improper examination of this application and the defective nature of the rejections issued in this case. None of these attachments contain data relating to the scientific merits of the present invention. Applicant has made numerous references to a Dr. Robert Park, whom he alleges to have had contact with a "Deep Throat" in the Office (page 31), and to have had "direct involvement in Blacklight's patent affairs" (page 32), "Blacklight" being the name of applicant's business. While applicant argues (page 24) that "the PTO rationalized its withdrawal of Blacklight's five allowed patent applications, in part, by citing a January 12, 2000 article written by Dr. Robert Park", citing a published article hardly constitutes contact with the author. The reference to the present applicant in the article does not mean that Dr. Park had obtained confidential information from the Office, because applicant published an edition of his book, *The Grand Unified Theory Of Classical Quantum Mechanics*, in January 2000. While applicant

argues (page 32) that Dr. Park knew about several of applicant's applications, the knowledge of which "is supposedly kept confidential", the Washington Post article by Dr. Park which refers to applicant's patent and a second application set to issue two weeks thereafter was published on 18 August 2000, which was three days after the publication of the U. S. District Court decision (part of Attachment K) which referred in which these applications were mentioned (page 1 thereof). Thus, both articles written by Dr. Park appear to be based on information that was already public at the two respective times that the articles were published. No "Deep Throat" or other improper contact would have been necessary.

Regarding the attachments 105-114, submitted with the IDS of 17 December 2004 or the IDS of 14 July 2005:

Attachments 58, 80, 108, 109 and 111-114 would fall into category (1), as set out in paper no. 20040827, because they have not been peer reviewed.

Attachments 108-111, 113 and 114 would fall into category (2), as set out in paper no. 20040827, because they speculate hydrino formation as an explanation for data not necessarily caused thereby.

Attachments 80 and 108-112 would fall into category (3), as set out in paper no. 20040827 because they contain data which cannot be accounted for by applicant's theory.

Attachments 60, 77, 81, 88, 94, 96-98 and 100-107 are already of record and have been addressed in previous office actions.

Please see also the Appendix attached to the present office action.

Art Unit: 1745

This is a Request for Continued Examination of applicant's earlier Application No. 09/501,621. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Kalafut whose telephone number is 571-272-1286. The examiner can normally be reached on Mon-Fri 8:00 am-4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan can be reached on 571-272-1292. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 09/501,621
